Cromandel/Charl's Green Breeding

INFORMATION

Seed list 3 of 2017

In this seed list we offer crosses made with Charl's Green as berry parent and pollen parent. Charl's Green is one of my favourite clivia plants. It performs consistent year after year and has been proven a good breeder.

Partners:-

1. Crown Prince - Outstanding bronze and very consistent performer.
2. Nakamura orange - a broad leaf plant with good compact structure.
3. Gunston - Well known plant with good flower count and unique colour.
4. Natal Yellow - group 2 yellow with good recurve form.
5. Orange - plant with wide tepals and good plant structure.
6. Hirao 689 - one of a few of my breeding hiraos.
7. Nakamura Variegated - plant with broad leaves and compact structure.
8. Nakamura Bronze - full umbel and broad leaves.
9. Coromandel/Charl's Green Breeding - very good umbel and flower count.
